SUMMARY

Self taught Software Developer skilled in designing, building, and developing APIs, databases, websites and web applications. I have knowledge of full stack development, devops and cloud computing. Proficient in using object oriented programming languages like Java and JavaScript, MVC frameworks like Spring, SpringBoot, Vue.js, and PHP's Laravel, I thrive on using my technical know-how to transform concepts and ideas into scalable software solutions.

I currently work as a member of the Core Programmers (DevOps) team at Union Bank of Nigeria, contributing to the development of innovative digital solutions for the bank.

EXPERIENCE

Software Engineer
Union Bank of Nigeria
05/2024 - Present

- Implemented a new feature in the company's Account Opening Application, increasing user engagement by 30%
- Developed background microservices to monitor transactions and update the fraud detection service
- Contributing to coding, bug-fixing, maintenance and documentation for the bank's corporate banking solution, Union360
- Optimizing code and database queries to improve application performance and decrease response time
- Understanding, modifying and maintaining existing codebase for better performance and improved user experience

Backend Developer (Intern)
Fatherland Global
11/2023 - 02/2024

- Built web applications and Restful API endpoints using JavaScript, PHP and Laravel
- Designed databases, optimized queries and created schemas using MySQL and MySQL workbench
- Contributed to the development of fatherland community app, and performed regular testing with Postman
- Participated in strategy meetings and debugging activities to reduce system downtime and improve scalability

Backend Developer (Trainee)
234 Web Resources
06/2023 - 11/2023

- Gained hands-on experience in building applications using core web development technologies
- Used PHP to write server-side scripts and backend logic
- Used MySQL to store and retrieve data, maintain and manipulate databases

IT Administrative Assistant
Oyo State Ministry of Youth & Sports
01/2023 - 12/2023

- Assisted in resolving technical issues and coordinated with the IT department for more complex issues
- Organized, managed, and maintained IT documents and assets ensuring accountability

EDUCATION

University of The People
Computer Science - BSc
10/2025 - Present

University of Ilorin   12/2017 - 12/2022
History & International Studies - B.A (Hons)
